

OUR PRODUCTION FOR THE MEDICAL SECTOR

*Since 2006 ATENA LUX has been operating on the hospital sector with its BEDHEAD UNITS. Today the company produce several models, each of them customized, for patient's rooms **for hospitals and nursing homes**, for medical premises of group 0,1 and 2, as for example intensive care units.*

*At the same time, the ATENA LUX production of specific lighting fittings for **operating theaters and clean rooms**, integrated into hermetic false ceilings, is increasingly successful.*

Here are some photos of recent hospital projects ...
